

When work conditions could result in serious injury or death...

...would you speak up?

Training session

Pre-registration encouraged

Wednesday, October 22

**5:30-6:30 pm Occupational Health Clinical Center
6712 Brooklawn Parkway, Suite 204, Syracuse**

- **How to “educate” your eyes**
- **Who to tell and how to say it to get results**
- **How to report serious hazards without getting fired**

WHAT IS AN “IMMINENT DANGER” at a workplace?

- **Threat of death or serious physical harm**
- **“Serious physical harm” means that a part of the body is damaged so severely that it cannot be used**
- **An imminent danger could be an exposure to a toxic substance or conditions that could shorten life span, or impair a person’s functioning.**

MOST FATALITIES OCCUR FROM FALLS!

Facilitators:

Wally Reardon – Nationally Recognized in 2014 as Health & Safety Activist of the Year by the National Council on Occupational Safety and Health

Christopher Adams – Regional Director, Occupational Safety and Health Administration

Patricia Rector – Workers’ Rights Advocate/Activist, Director of Outreach and Education, Occupational Health Clinical Centers

Learn more about new WHISTLEBLOWER PROTECTIONS!
